

Conformal Coating

Reliable Performance in Harsh Environments

To ensure the reliability and longevity of SSDs and DRAM modules in extreme environments, conformal coating provides an additional layer of protection against moisture, dust, and chemical contaminants. This specialized coating enhances durability, preventing short circuits and corrosion while maintaining optimal performance. Ideal for industrial, automotive, and military applications, conformal coating safeguards your storage and memory solutions.

Moisture & Dust Resistance

Prevents damage from humidity and airborne particles.

Chemical Protection

Shields against corrosive substances and pollutants.

Flame Retardant Grade: UL94 V-0

Self-extinguishing, fire-resistant coating for enhanced safety.
